

Career Services at Virginia Tech

Post-Graduation Report: Employers most frequently cited by new graduates

Employed bachelor's degree graduates were asked to name their employers. These employers were most frequently reported.

- Numbers of graduates hired are shown for 1995-1996 and 1996-1997.
- Employers' positions within each list do not necessarily equate to ranking; employers sometimes are tied in numbers hired.
- Employers most frequently cited by new graduates account for the minority of the total grads hired.

Example: 1996-1997 top employers hired 255 grads, accounting for 13.66% of the 1866 grads who reported being employed.
